

BIG DATA CONFERENCE EUROPE 2025

AI, Cloud and Data Conference

ONSITE & ONLINE

9th EDITION

November 18, 2025

Workshops

Simbiocity Nova, Vilnius

November 19-21, 2025

Conference

Multikino, Vilnius & Online

Instructors

Przemek Harazny

Senior Power BI Developer | BI
Solutions Architect | Tech &
Team Lead

Clouds on Mars

Estera Kot, PhD

CTO & Tech Lead

Former Principal
Product Manager, Fabric DE&DS
Product Group

Clouds on Mars

Category	Description
Workshop Format	This is a hands-on workshop. You'll be actively involved in coding, implementing, and problem-solving.
What to Expect	Real-world scenarios and exercises. Direct application of concepts in live environments.
Participant Engagement	Please have your laptops and necessary tools ready. Prepare to code, collaborate, and share insights.
Hands-on	Please delve into the detailed descriptions provided for each exercise and step. Examine the attached screenshots carefully, and note the sequential visualization presented as 1), 2), 3). Review them thoroughly.
Support and Collaboration	Instructors and facilitators are here to guide you. Feel free to ask questions and help your fellow participants.
Outcome	By the end of this workshop, you'll have practical experience and new skills to apply directly to your projects.

Unified
business model

OneLake for all data

“The OneDrive for data”

A single SaaS lake for the whole organization

Provisioned automatically with the tenant

All workloads automatically store their data in the OneLake workspace folders

All the data is organized in an intuitive hierarchical namespace

The data in OneLake is automatically indexed for discovery, MIP labels, lineage, PII scans, sharing, governance, and compliance

2) Code: 89483501

Exercise 1

Ingest data with data pipelines
and shortcuts

Exercise 1

Ingest data with data pipelines and shortcuts

green 2015 01

Load by Data Factory
Data Pipeline Copy Data

green 2023 01

Do not Load.
Only create shortcut.

Break

Grab a coffee, stretch your legs, and get ready for the upcoming challenges!

Exercise 2

Transform data using Notebooks
and Spark clusters

Exercise 2

Transform data using Notebooks and Spark clusters

Data science in Microsoft Fabric

End-to-end data science for predictive business insights

Data Centric

- Easy and secure access to lake-centric data
- Open Delta Lake support promotes reproducibility
- Native integration with data infrastructure

Developer friendly

- SaaS experiences with quick setup
- Code authoring experiences in Notebooks and IDE
- VS Code integration

Rich ML tools

- Supports MLFlow model and experiment management
- Built-in, scalable ML tools with SynapseML
- Direct Lake mode for serving predictions to BI reports

Promotes collaboration

- Unified platform for all analytics roles incl. data scientists
- Secure and easy sharing of data, code, models and experiments

The Fabric Data Science experience
